EXPERIENCE

Cyber Security Engineer

Swedbank

📅 March 2019 - December 2021 📍 Stockholm, Sweden

I'm subject matter expert for Syslog service and SIEM within LMI service (Log Management and Intelligence). As a team member, I'm directly participating in configuration, monitoring and analyses of new syslog and SIEM solutions. Moreover, I'm daily engaged with bash and python scripting and developing various scripting solutions for security services.

Devops Engineer

Birkle-IT, IT Delivery Team

📅 June 2018 – March 2019 📍 Tallinn, Estonia

I was responsible for administering and troubleshooting of Docker containers, Active Directory environment, Virtualized Windows and Linux Servers. I also, provided automation of software development process using CICDI tools and scripting. I also was main responsible person for administration and configuration Microsoft Azure and Office365. Next, responsibility was maintaining and configuring Network devices, Rack-mounted servers and firewall.

Senior System Administrator

Veyselglu LLC, System and Network Division

📅 February 2013 – August 2016 📍 Baku, Azerbaijan

Veyselglu LLC is the second biggest company in Azerbaijan and I have worked as a System Administrator on that company. My responsibilities were: Design, install and configure internal and customer facing servers, network devices and firewalls; Administer and support core Microsoft, Cisco and VMware technologies; Develop and implement project plans, risk assessments and contingency plans; Administration and automation of Microsoft Azure and Office 365. Interact with customers and staff at the technical level, as required

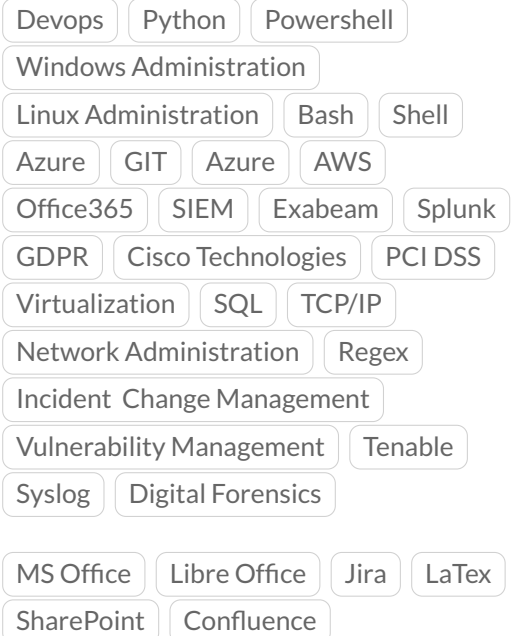

Software Developer

Central Election Commission, Information Technology Department

📅 May 2010 – January 2013 📍 Baku, Azerbaijan

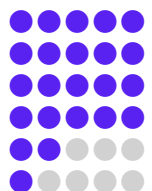

I have worked as Mid-Software Developer and created desktop applications for national election systems. These applications were developed by C++ and Borland Delphi programming languages and engaged with huge SQL databases.
